-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 November 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 14-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Scag (4146105, cited by Applicant).

Scag recites:

Art Unit: 3671

In re claim 1, reciting "substantially" and parallel to a "longitudinal axis of the mower"

it is noted that, "substantially" also is interpreted slightly upwardly or sideways as shown by Scag, since the claim does not state **exactly** nor provide recitation that limits it to **strictly** "parallel" **only** interpretation;

further noted that, while Scag's chute extends rearwardly as broadly claimed, it is still parallel to a longitudinal axis of the mower, especially since "a longitudinal axis of the mower" is not defined by the claim (i.e. no

Art Unit: 3671

specific points on the mower defined to form the longitudinal axis), as shown in the figure below for better demonstration, Scag shows a substantially parallel formation between the chute axis and the mower longitudinal axis:

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 24 is rejected under 35 U.S.C. 103(a) as being unpatentable over Scag (4146105, cited by Applicant), in view of Sugden (6192666).

Scag discloses the claimed device except for side discharge port.

Sugden discloses that it is known in the art to provide a side discharge port, because it is not always permitted to collect grass clippings; therefore Sugden provides both a rear discharge & collection means and a side discharge means (col. 1, ln 6-15; col. 2, ln 45-47).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the deck of Scag with the teachings of Sugden, in order to be able to conform to varying conditions/rules as to collecting grass clippings and discharging back to the field.

Response to Arguments

5. Applicant's arguments filed 11/8/2005 have been fully considered but they are not persuasive.

In re applicant's argument on page 2, last paragraph, as the examiner outlined above and in the previous rejection, there are two reasons why the "substantially parallel" feature is met by the prior art. The phrase "substantially" interpreted as broadly as claimed. The applicant is welcome to modify claim to define the axis 166 as shown in figure 5. Furthermore, as detailed above, the "longitudinal axis of the mower" is not defined in the claim and/or shown. So, it can be interpreted as shown in the rejection above.

In re applicant's argument on page 4, next to the last paragraph, it is unclear what deficiency the applicant refers to. The combination of references teach the embodiment outlined in claim 24.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
